

# Scholls Ferry Road Pipeline Installation Begins from Roy Rogers Road to Murray Boulevard

Work has begun on Phase 3 of the Metzger Pipeline East Project (MPE\_1.3). Construction will take place within SW Scholls Ferry Road from Roy Rogers Road to Murray Boulevard through the fall of 2024. Work consists of pipeline installation and related tasks. Work hours are generally from 6:30 am to 5:30 pm Monday through Friday, with the exception of work at most intersections and other potential activities scheduled for nighttime work. Crews will work in 400-foot sections, and incrementally move from west to east with the pipeline, then work on smaller tasks after the pipe is installed. Please ensure you and others in your care obey posted signs to stay safe. Businesses will remain open, and access maintained.

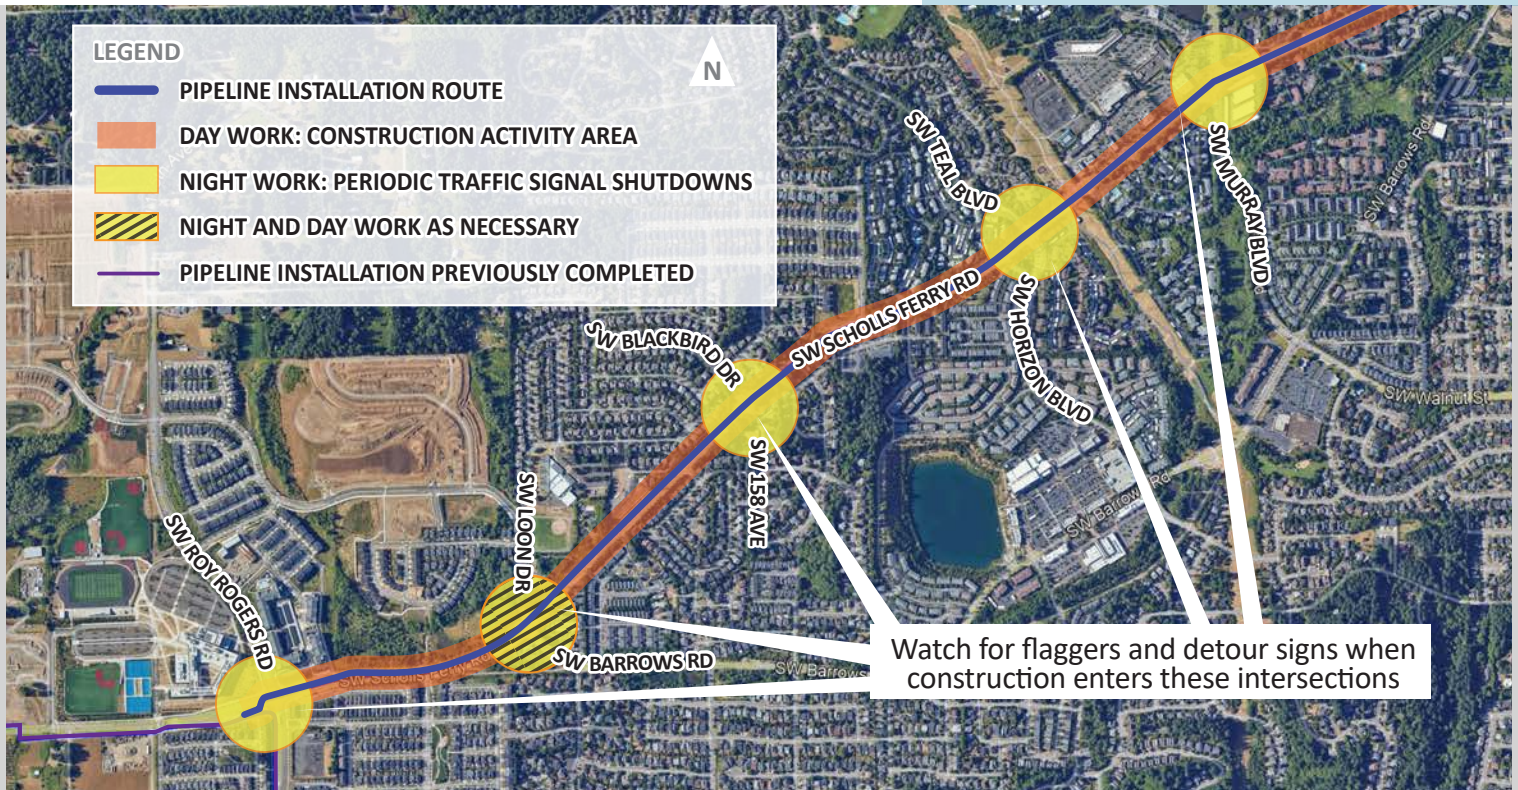

## Expect:

- Traffic congestion, delays & detours
- Auto & bicycle lane closures
- Intermittent bus stop closures & delays
- Crosswalk closures

Construction will mostly occupy the center lane of the road. Bicycle lanes will be merged into the auto travel lanes. No left-hand turns will be permitted through the work zone. Motorists should perform right turns only. We are working with the City of Beaverton, City of Tigard, Washington County, Oregon Department of Transportation and other regulating agencies to make sure we are abiding by codes and regulations as we perform this work.

## Expect Noise, Vibration and Occasional Nightwork

Those fronting Scholls Ferry Road will likely experience noise and vibration from pipeline construction. Occasional night work may also occur. Large equipment to excavate and install pipeline is necessary for this construction. The construction crews are working as quickly as possible, but disturbances are unavoidable. The work will produce vibrations neighbors will feel to varying degrees. Our team is monitoring our impacts, mitigating our nuisances, and taking steps to protect neighbors from property damage that may result from activities. Night work is sometimes necessary to reduce the duration of construction, reduce traffic impacts and minimize impacts on local businesses. We appreciate our neighbors' patience as we install this additional, seismically resilient drinking water pipeline.

# Heads Up!

Map and additional information inside

**The Willamette Water Supply System (WWSS) MPE\_1.0** project is a partnership between the Tualatin Valley Water District (TVWD), City of Hillsboro, and City of Beaverton to build a new seismically resilient drinking water system by 2026. The project combines planned improvements by TVWD with WWSS and the City of Beaverton water construction projects. The combined project maximizes cost-effectiveness and reduces community and environmental construction impacts. Those living, traveling, working, and shopping along portions of SW Scholls Ferry Road, SW Hall Boulevard, SW Cascade Avenue, SW Allen Boulevard and Western Avenue can expect various construction activities from the fall of 2021 until the fall of 2024.
